

Nanotechnology Research Center

Mashhad University Of Medical Sciences

Nanotechnology Research Center established in Mashhad University of Medical Sciences on March 2009. It is located in Mashhad Bu Ali Research Institute with director Dr. Mahmoud Reza Jaafari.

The center provides an organization wherein researches work together in the field of application of nanotechnology in medicine, pharmaceutical sciences and basic medical sciences.

The members of the center have wide-ranging research interests and an exciting creative approach to applying nanomethods.

Drug delivery and gene delivery, as critical fields in the treatment, are the main research areas.
